Dear Governor Rockefeller:

I am pleased to submit the tenth annual report on crime in West Virginia. This report is constructed and delivered in accordance with Chapter 15, Article 2, Section 24 of the Code of West Virginia. The information is based on statistics submitted by law enforcement agencies within West Virginia for the year of 1981 on a daily, monthly and annual basis.

The purpose of this report is to provide reliable data of a comprehensive nature to the criminal justice community. It is the intent of the legislation and our hope that both the graphic and statistical representations of crime factors will be an aid to law enforcement personnel in planning crime prevention activities throughout the entire State of West Virginia.

In accordance with your directive, Governor, I am dedicating this report to all law enforcement officers and other public officials who have participated in and assisted the Uniform Crime Reporting Program in West Virginia. Without the meaningful input and interest of the law enforcement community in West Virginia, this report would not have been possible.

Sincerely yours,

Message From The Staff

Early in 1979, under mandate from Congress to the FBI, UCR began collecting Arson data as a Crime Index Offense. Although Arson is to be treated as a Part I Crime Index Offense, due to complications in absorbing Arson data into the present UCR computer system and due to the newness of statistical data collected, Arson data is not included in any summary report of Part I Crime Index Offenses in the 1981 UCR Annual Report. A summary of Arson data for the year 1981, however, is included at the end of this report. We apologize for any inconvenience due to this arrangement and ask that you bear with us.

In accordance with House Bill 802 summary information on Domestic Violence is included in this year's addition of Crime in West Virginia.

INTRODUCTION

The West Virginia Uniform Crime Reporting (UCR) Program is a statewide uniform method of collecting crime statistical data, under the direction of the Uniform Crime Reporting Division, West Virginia Department of Public Safety. Its purpose is two-fold:

1. To provide a consolidated annual report concerning crime in West Virginia, and
2. To report state-wide crime statistics from a single agency to the Federal Bureau of Investigation

National Uniform Crime Reporting Program

The counterpart of all state-wide UCR programs is the National UCR Program under the direction of the Federal Bureau of Investigation. This National program was the result of a need for nation-wide uniform compilation of law enforcement statistics. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police. Today the IACP continues to serve in an advisory capacity to the FBI in its operation of the UCR program.

In the last several years the FBI has been actively assisting individual states in the development of state-wide programs for the collection of law enforcement statistics. Although individual UCR programs may vary from state to state, all state programs must be compatible with the National UCR Program. Presently there are 41 operational state-level UCR Programs. Crime statistics submitted by individual law enforcement agencies from all fifty (50) states, whether reported through state-level UCR programs or directly to the FBI, are presented annually in the FBI's Uniform Crime Reports publication, *Crime in the United States*.

West Virginia Uniform Crime Reporting Program

Taking advantage of the invaluable assistance provided, West Virginia developed its own state-wide program for collection of law enforcement statistics.

Purpose and Objectives

The fundamental objectives of the West Virginia UCR Program are:

1. Inform the Governor, Legislature, other government officials, and the public as to the nature of the crime problem in West Virginia - its magnitude and its trends.
2. Provide the FBI with complete UCR data to be included in the National crime reports.
3. Provide law enforcement administrators with the best possible data available to help combat individual problem areas.
4. Determine who commits crimes by age, sex, race and ethnic origin and by other attributes in order to find the proper focus for crime prevention and enforcement.
5. Provide base data and statistics to measure the workload and effectiveness of West Virginia's Criminal Justice System, to measure the effect of prevention and deterrence programs, and to assist in the assessment of social and other causes of crime for the development of theories on criminal behavior.

Development

The West Virginia Legislature in the Criminal Identification Bureau Act of 1971 established the Uniform Crime Reporting Statute.

Criminal Identification Bureau Act of 1971 Chapter 15, Article 2, Section 24, Sub-Section I

(i) All state, county and municipal law enforcement agencies shall submit to the bureau uniform crime reports setting forth their activities in connection with law enforcement. It shall be the duty of the bureau to adopt and promulgate rules and regulations prescribing the forms, general content, time and manner of submission of such Uniform Crime Reports. Willful or repeated failure by any state, county or municipal law enforcement official to submit the Uniform Crime reports as required in this article shall constitute neglect of duty in public office. The Bureau shall correlate the reports submitted to it and shall compile and submit to the governor and the legislature semi-annual reports based on such reports. A copy of such reports shall be furnished to all prosecuting attorneys and law enforcement agencies.

The responsibility and authority for collection and dissemination of UCR data was given to the West Virginia Department of Public Safety (State Police). This program became operational January 1, 1972.

Reporting Procedure

Under the West Virginia UCR Statute, law enforcement agencies are required to submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agency's record of complaints, investigations and arrests. Offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities, county sheriff's departments and state police report those crimes which occur within the counties but outside of the cities.

Uniform crime reports are submitted on a monthly basis. Law enforcement agencies report the number of offenses known to them in the following Part I crime categories:

- (1) Criminal Homicide
- (2) Forcible Rape
- (3) Robbery
- (4) Felonious Assault
- (5) Breaking and Entering
- (6) Larceny
- (7) Motor Vehicle Theft
- (8) Arson

In addition, law enforcement agencies report on a monthly basis supplemental offense information such as the value of property stolen and recovered, the circumstances surrounding homicides and rapes, the age, sex, race and ethnic origin of all persons arrested, and police disposition of juveniles. Police employee data is collected on an annual basis.

Verification Process

An obvious concern in the collection of crime statistics from law enforcement agencies throughout the state is the uniformity and accuracy of data received. All law enforcement agencies are furnished with the Uniform Crime Reporting Handbook which outlines in detail the proper procedures for scoring and classifying offenses. However, program aides such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the agencies. Additional controls therefore are necessary.

Each report received by the UCR Section is recorded, examined and verified for mathematical accuracy and possibly more important for reasonableness. The elimination of duplication of reporting by agencies receives particular attention. Checks are built into the data processing of the reports to further ensure their validity and accuracy. The UCR Program, however, is still affected to some degree by problems such as incorrect reports, incomplete records, misinterpreted data and human error, as are all statistical programs. In addition, it should be pointed out that there is no way of determining the actual total number of crimes which are committed. Many criminal acts occur which are not reported to official sources. It is for this reason the Uniform Crime Reporting Program focuses its attention on the offenses which are reported to law enforcement agencies.

In spite of these and other shortcomings, the Uniform Crime Reporting Program still provides the best information available concerning crime in West Virginia.

Population Data

The computation of crime rates as they appear in this report by municipality, county and state is based on 1981 population data provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the West Virginia System is based upon the proper classification of offenses by police.

The adoption of the Federal System of Uniform Crime Reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the West Virginia Uniform Crime Reporting System.

In view of the need for compatibility with the federal system "offenses" under the program are not distinguished by designation of "high misdemeanors," "misdemeanors," or violations of municipal ordinances. The explanations of offense classifications may vary slightly with those employed at the federal level because the language used is that familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed on the national level.

Part I Offenses

Offense data consists of information that has been extracted from reports of Part I crimes that have come to the attention of West Virginia law enforcement agencies. PROFILE STATE OF WEST VIRGINIA

West Virginia, truly deserving of its nickname "Mountain State" possesses an abundance of resources — natural, educational and recreational — for its citizens and for visitors to this fine state.

Bordered by the states of Pennsylvania, Maryland, Ohio, Kentucky and Virginia, West Virginia is located between the large population centers of the East and Midwest. Four principal Metropolitan market areas — New York, Chicago, Philadelphia and Detroit — are within a 500 mile radius of the state.

Comprised of 55 counties, with a population in 1981 of 1,951,000 and a density of 80.4 persons per square mile, West Virginia is primarily a rural state. Known best as one of the major coal producing states, West Virginia continues to move to the forefront in terms of energy production, research, and development. In addition to an increased emphasis on coal, natural gas liquids and petroleum continue to be important mineral resources. And in the Ohio and Kanawha River Valleys the chemical industry has become a major economic force in the state. Add to these other resources such as metals and high quality timber from our vast woodlands, and it becomes obvious that West Virginia's economy is quite diverse.

Two areas of improvement West Virginians are quite proud of are in education and in recreation. Advancements in education include the addition of two medical schools, plans for a second law school, a greatly expanded statewide College of Graduate Studies, as well as many new elementary, secondary, vocational and technical schools throughout the state.

In the area of recreation, West Virginia is a state with an exceptional outdoor recreation base. Its varied topography, climate and resources give it the potential of being a year-round recreation land serving the people of the Eastern United States. With its fine fishing streams, picturesque mountains and abundant forest areas, West Virginia's state parks and forests continue to attract visitors in ever-growing numbers.

This profile is presented to help the reader gain a better understanding of the state of West Virginia.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of West Virginia and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime-influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime In A Free Society" (1967-Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, race and ethnic origin.

Economic status of the population.

Relative stability of the population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The Administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

CRIME INDEX

The tabulations presented in the tables, graphs, and charts in this publication indicate the volume and distribution of crime in West Virginia on the basis of a Crime Index. The crime figures are broken down by municipal, county and state totals.

The Uniform Crime Reporting Program utilizes eight crime classifications to establish an index to measure the trend and distribution of crime in the United States. These crimes—Murder, Forcible Rape, Robbery, Felonious Assault, Breaking & Entering, Larceny Theft, Motor Vehicle Theft and Arson—are counted by law enforcement agencies as the crimes become known to them. These crimes were selected for use in the Crime Index because, as a group, they represent the most common local crime problem. They are all serious crimes, either by their very nature or due to the volume in which they occur. Offenses of Murder, Forcible Rape, Robbery, and Felonious Assault are categorized as Violent Crimes. Offenses of Breaking & Entering, Larceny-Theft, Motor Vehicle Theft and Arson are classed as Non-Violent Crimes.

The crime counts set forth in this publications are for actual offenses established by police investigation. In 1981, 50,528 Crime Index Offenses were known to police.

Calculation of Rates and Percentages

Monthly and annual Uniform Crime Reports currently received from 375 municipal, county and state law enforcement agencies in West Virginia represent 100 percent of the estimated West Virginia population.

The West Virginia State Police maintain at least one detachment in each of the 55 counties throughout the state. Each detachment is mainly responsible for law enforcement in the rural areas of the respective county. Therefore, there are two law enforcement agencies (state police and sheriff's department) in each county which serve the same area and essentially the same population. Because of this fact, to attempt to compute a crime rate for each of the agencies would be unreasonable. The problem was resolved by combining activity reported by both agencies into one category hereafter referred to in this report as "rural county". However, the number of offenses and the percent of offenses cleared is listed separately for each agency.

This report provides police executives with a yardstick with which to measure local crime problems. To use this report as an administrative tool, data must be converted into rates and percentages. Simple formulas for this purpose are presented below.

Crime Rates

The most used of all crime statistics is the Crime Index Rate, which refers to the number of Crime Index offenses per 100,000 inhabitants. It can be calculated by either of two procedures.

One procedure is to divide the number of Crime Index Offenses by the population, and to multiply the result by 100,000.

EXAMPLE:

$$\frac{1,980 \text{ Robberies}}{500,000 \text{ Population}} = .003960 \times 100,000 = 396.0 \quad \text{Crime Rate}$$

Robberies per 100,000 persons

Another procedure is called the reciprocal method. It can be used to calculate crime rates for a number of different offense classifications. The **reciprocal** is determined by dividing 100,000 by the population. The reciprocal can then be multiplied by the number of offenses for each crime to determine the rate per 100,000.

EXAMPLE:

$$\frac{100,000}{500,000 \text{ population}} = .200000 \quad \text{Reciprocal} \quad \times \quad \begin{matrix} \text{Number of} \\ \text{Robberies} \\ 1,980 \end{matrix} = 396.0 \quad \text{Crime Rate}$$

Robberies per 100, 000 persons

All Crime Rates which were calculated for the total number of offenses committed in the State were based on the number of offenses per 100,000 persons.

However, due to the fact that no city within the State has a population over 100,000, calculations for each individual contributing agency were based on the number of offenses per 1,000 persons.

Clearance Rates

For Uniform Crime Reporting purposes, a Crime Index Offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender. An offense may be exceptionally cleared when it falls into one of the following categories:

1. The offender commits suicide.
2. A double murder occurs (two persons kill each other).
3. The offender dies after making a confession (dying declaration).
4. The offender is killed by a law enforcement officer.
5. The offender confesses to committing the crime while already in custody for another crime or serving a sentence.
6. The offender is prosecuted in another city for a different crime by federal, state or local authorities, or for the same offense, and the other jurisdiction refuses to release the offender.
7. Another jurisdiction refuses to extradite the offender.

8. The victim of a crime refuses to cooperate in the prosecution.
9. The offender is prosecuted for a less serious charge than the one for which he was arrested.
10. The offender is a juvenile who is handled by a verbal or written notice to the parents in instances involving minor offenses such as petit larceny.

For the year of 1981, 23.9 percent of all Index Crimes were cleared as compared to 23.6 percent cleared during 1980. The percentage of Violent Crimes cleared was 65.4 percent in 1981 and 66.7 percent in 1980 while the clearance rate for Property Crimes was 21.0 percent in 1981 and 20.3 percent in 1980.

CRIMINAL HOMICIDE - MURDER

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault, or commission of a crime is included. This index offense is scored by police on the basis of their investigation without regard as to the findings of a court or jury or the decision of a prosecutor. Attempts to kill and assault to kill are scored as felonious assaults and not as murder. Suicide, accidental deaths, justifiable homicides and traffic deaths caused by the negligence of someone other than the victim are not included.

FORCIBLE RAPE

Forcible Rape is the carnal knowledge of a female forcibly and against her will. For the purpose of Uniform Crime Reporting, rape is divided into two categories: (1) Rape by Force; and (2) Attempted Rape. Carnal abuse without force (statutory rape) and other sex offenses are not included.

Forcible Rape differs from other violent crimes in that the victim in many cases, is hesitant in reporting the offense to police. The rigors of court procedures, embarrassment and fear of any accompanying stigma have a deterrent effect on the victim's willingness to make the crime known to police. The presence of a prior relationship between victim and perpetrator makes the determination of the act of force difficult to establish, and the usual clandestine nature of the offense presents a problem in verification.

FORCIBLE RAPE SUMMARY

1981

A total of 291 Forcible Rape Offenses were reported for 1981.

Forcible Rapes comprised 8.6 percent of the total for the Violent Crime Category and less than one percent of the total Crime Index Offenses.

August recorded the highest number of Forcible Rapes with 33.

A total of 206 Forcible Rapes were cleared by arrest or exceptional clearance, a clearance rate of 70.8 percent. Adults were involved in 190 of the clearances.

There were 182 persons arrested for Forcible Rape offenses; 178 of those arrested were males, 21 were under 18, and 166 were white.

ROBBERY

Robbery is defined as the felonious and forcible taking of the property of another against their will by violence or by putting them in fear. The element of personal confrontation is always present in this crime. Under the Uniform Crime Reporting Program, all assaults or attempts to rob are included. Robberies are reported in four general categories - gun; knife or cutting instrument; hands, fists, feet, etc.; and other dangerous weapons. As a general rule, robbery differs from larceny in that it is aggravated by the element of force or the threat of force.

Robbery, as a crime of violence, has a serious impact on the victim. In many instances, serious injury results. Oftentime, along with physical injury or without, the victim suffers mental disturbance. Such damage is immeasurable. This is emphasized when the attempt to rob results in the death of the victim. Of course, in this case, the robbery would not be scored since the more serious offense, murder, would be reported and the robbery would serve as the motive. The placing of a dollar value, however, on the damage resulting from this type of offense is an attempt to measure that which is immeasurable.

ROBBERY SUMMARY

1981

A total of 977 Robbery Offenses were reported for 1981.

Robberies comprised 28.9 percent of the total for the Violent Crime category and 1.9 percent of the total Crime Index Offenses.

December recorded the highest number of Robberies with 112 offenses.

The total dollar value for Robbery offenses was \$483,603, an average of \$495 for each offense.

A total of 343 Robberies were cleared by arrest or exceptional clearance, a clearance rate of 35.1 percent. Adults were involved in 289 of the clearances.

There were 481 persons arrested for Robbery offenses; 437 of those arrested were males, 91 were under 18, and 376 were white.

FELONIOUS ASSAULT

Felonious Assault, as defined under the West Virginia Uniform Crime Reporting Program, is an attempt or offer with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife, or other weapon is used which would result in serious physical injury if the crime were successfully completed.

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists, or feet separates this offense from those assaults categorized as "simple" and not felonious in nature.

The victim of an actual assault of this type may suffer serious injury or permanent disability and all assaults to kill and attempts to kill are recorded in this area. As with murder, the use of weapons to inflict these serious injuries make this offense a subject for analysis.

FELONIOUS ASSAULT SUMMARY

1981

A total of 1,994 Felonious Assault Offenses were reported for 1981.

Felonious Assaults comprised 59.0 percent of the total for the Violent Crime category and 3.9 percent of the total Crime Index Offenses.

July recorded the highest number of Felonious Assaults with 229 offenses.

There were 102.2 Felonious Assaults per 100,000 population in West Virginia.

A total of 1,544 Felonious Assaults were cleared by arrest or exceptional clearance, a clearance rate of 77.4 percent. Adults were involved in 1,413 of the clearances.

There were 1,020 persons arrested for Felonious Assault offenses; 914 of those arrested were males, 55 were under 18, and 876 were white.

BREAKING AND ENTERING

Under this Program, Breaking and Entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.

Data collection for this offense is further categorized as to forcible entries, unlawful entries where no force is used, and attempted entries.

As with other nonviolent crimes, the motive of personal gain coupled with the element of opportunity, results in the commission of this offense by both the amateur and the professional perpetrator. Only the absence of confrontation and the use of force separate this crime from Robbery of the violent crime group. However, detection during commission many times results in a confrontation of the victim by the perpetrator demonstrating why this offense is considered the most serious of the nonviolent crime group.

The volume of this offense presents the police with a serious enforcement problem made more difficult in many areas by the lack of sufficient personnel to act as a deterrent and to provide successful solutions of these crimes.

BREAKING AND ENTERING SUMMARY

1981

A total of 14,905 Breaking and Entering offenses were reported for 1981.

Breaking and Entering comprised 31.6 percent of the total for the Non-Violent Crime category and 29.5 percent of the total Crime Index Offenses.

February recorded the highest number of Breaking and Enterings with 1,436 offenses.

There were 764.0 Breaking and Enterings per 100,000 population in West Virginia.

Breaking and Enterings of residences accounted for 8,679 of the total offenses; 8,346 of the total offenses were at night.

The total dollar value for Breaking and Entering offenses was \$11,418,318, an average of \$766 for each offense.

A total of 2,965 Breaking and Enterings were cleared by arrest or exceptional clearance, a clearance rate of 19.9 percent. Adults were involved in 2,074 of the clearances.

There were 3,148 persons arrested for Breaking and Entering offenses; 3,038 of those arrested were males, 1,103 were under 18, and 2,909 were white.

LARCENY-THEFT

Larceny-Theft is the unlawful taking or stealing of articles of value without the use of force, violence, or fraud. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from autos, and the theft of auto parts and accessories. Motor Vehicle Theft is excluded from this category for crime reporting purposes, inasmuch as it is a separate Crime Index Offense.

Larceny offenses cleared by police arrest are dramatically affected by the nature of the crime. As with other Non-Violent Crimes, opportunity and stealth, working in favor of the perpetrator and against police detection, reduce solutions for this offense.

As with other offenses against property, Larceny is primarily a crime of opportunity. Types of Larcenies will differ in volume depending upon the opportunity for theft offered in a given area.

When average value is applied to the reported crimes in this category, the dollar loss to victims was \$394. It is true that a portion of goods stolen was recovered and returned to the victims, but the relatively low percentage of crimes cleared by arrest, and the lack of specific identification characteristics on such property indicates these recoveries will not materially reduce the overall loss. In addition, many offenses in this category, particularly where the value of goods stolen is small, never come to police attention.

LARCENY-THEFT SUMMARY

1981

A total of 28,587 Larceny-Theft offenses were reported for 1981.

Larceny-Theft comprised 60.6 percent of the total for the Non-Violent Crime category and 56.6 percent of the total Crime Index Offenses.

July recorded the highest number of Larceny-Thefts with 2,563 offenses.

There were 1,465.2 Larceny-Thefts per 100,000 population in West Virginia.

Larceny-Thefts from automobiles accounted for 6,998 of the total offenses.

The total dollar value for Larceny-Theft offenses was \$11,274,115, an average of \$394 for each offense; of the total offenses, 10,788 were \$50 to \$200 in value.

A total of 5,982 Larceny-Thefts were cleared by arrest or exceptional clearance, a clearance rate of 20.9 percent. Adults were involved in 4,881 of the clearances.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, Motor Vehicle Theft includes all thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this State. This definition excludes taking a motor vehicle for temporary use, such as family situation or unauthorized use by others having lawful access to the vehicle, such as chauffeurs, etc.

The crime of Motor Vehicle Theft has been labeled primarily as a crime of opportunity. The youthful offender finds the motor vehicle easily accessible for transportation for any purpose. The remaining thefts are mainly for the purpose of resale, theft of parts, and for use in committing other crimes.

WEST VIRGINIA ARREST DATA

WEST VIRGINIA ARREST INFORMATION

The West Virginia Crime Reporting Program requires the monthly reporting of data concerning persons arrested in the state. A record of total arrest activity for criminal acts in both Part I and Part II crime classes is received from 375 county, state and municipal law enforcement agencies and is analyzed and arranged according to age, sex, race and ethnic origin of persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 90,677 arrests for Part I and Part II criminal offenses were reported during 1981. This was a decrease of 558 arrests over the 1980 figure of 91,235. Based on 1981 population estimates, there was a statewide arrest rate of 4,647.7 arrests per 100,000 persons in West Virginia. The arrest rate in 1980 was 4,679.6.

Since 1977, the number of persons arrested for Part I and Part II offenses has increased 25.1 percent while the arrest rate has increased 19.2 percent.

A person is counted on the monthly arrest report each time he or she is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to the differences in local arrest procedures and policies. It should be noted that a person may be arrested several times during a given month for the same or different offenses. This occurs frequently for such crimes as drunkenness, disorderly conduct and similar offenses. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when police or other official action beyond a mere interview, warning or admonishment is taken.

These arrest figures do not indicate the actual number of individual persons arrested or summoned since, as has been pointed out, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring the involvement in criminal acts by the age, sex, race and ethnic origin of the perpetrators.

Of all reported arrests for 1981, 12.8 percent were for Part I offenses (Murder, Forcible Rape, Robbery, Felonious Assault, Breaking and Entering, Larceny - Theft and Motor Vehicle Theft). Analysis of Part I arrests indicates that Larceny, as in past years, comprised the highest percentage of all arrests for Part I crimes with 51.2 percent. The "drunkenness" category continues to record the highest percent of arrests for Part II offenses. In 1981, this offense accounted for 47.1 percent of all reported arrests for Part II crimes.

Juveniles were involved in 7.7 percent of the arrests in 1981 compared to 7.9 in 1980. This marked a decrease of 0.2 percent of juvenile participation in criminal acts. Female arrests amounted to 12.0 percent of the total compared to 11.5 in 1980. Since 1977 female participation has decreased 5.8 percent in Part I offenses, and increased 1.1 percent for total Part I and Part II offenses.

Arrests by race show that 93.6 percent of the persons arrested were White while 6.4 were Negro. Hispanics comprised 0.2 percent of all persons arrested in 1981.

VIOLENT CRIME

Arrests for crimes of violence (Murder, Rape, Robbery and Felonious Assault) on a statewide basis accounted for 15.6 percent of all arrests for Part I and 2.0 percent of the total arrests for all offenses. A further evaluation indicates that arrests for Felonious Assault were the most frequent, representing 56.3 percent of the total arrests for violent crimes.

PROPERTY CRIME

Property crime arrests (Breaking and Entering, Larceny - Theft and Motor Vehicle Theft) comprised 84.4 percent of all arrests for Part I offenses and 10.8 percent of all arrests.

The highest percentage of property crime arrests, 60.6 percent, occurred in the larceny category.

NARCOTIC DRUG LAW ARRESTS

Information concerning arrests for narcotic drug law arrests is collected and analyzed according to specific drug categories. During 1981, a total of 2,219 arrests were made for narcotic drug law violations, a decrease of 98 arrests over 1980. Evaluation of data reported for 1981 discloses that 33.9 percent of all persons arrested for narcotic drug law violations were under 21 years of age. Moreover, 8.5 percent of those arrested were under 18 years of age. Analysis of individual drug categories showed that the highest percentage of arrests, 85.4 percent, involved marijuana. The lowest percentage of arrests occurred in the opium, cocaine and their derivative category, amounting to only 3.5 percent.

GAMBLING ARRESTS

Arrests for gambling offenses during 1981 amounted to 0.2 percent of all reported arrests for Part I and Part II offenses. Of those arrested for gambling, 81.0 percent were males. The highest percentage of arrests for gambling offenses, 16.6 percent, occurred in the 35-39 age categories. A total of 163 gambling arrests were reported during 1981, a decrease of 30 from the 1980 figure.

JUVENILE DISPOSITION DATA

Each police department must provide information regarding the disposition of juveniles arrested by that department. The following summary is provided.

Referred to Juvenile Court or Probation Department	4,305
Referred to Welfare Agency	58

LAW ENFORCEMENT EMPLOYEE DATA

POLICE EMPLOYEE DATA

1981

The Uniform Crime Reporting Program in West Virginia incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, distributions, assaults against law enforcement officers and circumstances surrounding the killing of police officers are discussed in this section.

This information is submitted by county, municipal and state law enforcement agencies and compiled on an annual basis. Specific information concerning the number of law enforcement employees reflect the status as of October 31, 1981, and is limited to municipal, county and state law enforcement agencies currently reporting to the West Virginia UCR Program.

A total of 3,794 full-time law enforcement employees was reported by the agencies, of which 2,922 were sworn personnel. This is a rate of 1.9 employees for each 1,000 inhabitants of the state and a rate of 1.5 officers for each 1,000 inhabitants.

The determination of police strength for any given area or municipality should be a subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The information in this section relates to reported police employee strength and should not be interpreted as recommended strength for any given municipality. Such determinations should be made after objectively evaluating the need for police services based on the above factors.

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. This current upward trend in police agencies to perform clerical duties is in line with the thinking of many police administrators who recommend the use of civilians in this capacity, thus freeing the sworn personnel for actual police related service. There were 872 civilians included in the total full-time law enforcement employees for West Virginia.

Municipal police departments reported a total of 1,786 employees, of which 1,462 were sworn officers. This is a rate of 1.9 sworn officers for each 1,000 inhabitants (urban population only).

West Virginia's 55 county sheriffs departments reported a total of 1,066 employees, of which 798 were sworn officers. This is a rate of 0.7 sworn officers for each 1,000 inhabitants (rural population only).

In an attempt at comparisons of employment levels of individual sheriff's departments with other agencies, consideration must be given to certain functions that are particular to a sheriff's department. The functions of county sheriffs departments vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county. These functions are usually performed by sworn officers, thereby presenting a misleading picture of the actual enforcement strength of the department.

The Department of Natural Resources reported a total of 118 employees in their Law Enforcement Division, of which 112 were sworn officers. This is a rate of 0.1 sworn officers for each 1,000 inhabitants (rural population only).

The West Virginia State Police reported a total of 824 employees, of which 550 were sworn officers. This is a rate of 0.5 sworn officers for each 1,000 inhabitants (rural population only).

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED 1981

The killing of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well being of the community and a serious breach of the internal security of the country. Today, a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is sworn to protect. This deplorable situation should be a subject of serious public concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following summary information:

In 1981, 3 law enforcement officers lost their lives in the line of duty.

Lieutenant Delbert Roush and Patrolman Eddy Duncan of the Charleston Police Department were shot and killed June 26, 1981 in the course of making a traffic stop.

Huntington Police Officer Paul Harmon was shot and killed December 14, 1981 while assisting a fellow officer who was investigating suspicious persons.

A total of 269 Assaults on Law Enforcement Officers were reported in 1981, of which 66, or 25.3 percent resulted in personal injury to the officer.

For every 1000 arrests, there were 3.0 Assaults, and for each 100 sworn officers there were 9.2 Assaults.

Personal weapons (hands, fists, feet, etc.) were used in 223 of the Assaults.

A total of 251 of the Assaults were cleared, a clearance rate of 93.3 percent.

**WEST VIRGINIA
OFFENSE DATA
COUNTY-STATE-MUNICIPAL — DNR**

The computer generated output tables contained within this section were designed to facilitate quick reference of statistical crime information relative to the different reporting areas of the State of West Virginia. The data contained in each of the series of reports will be detailed on a page preceding each listing.

Each of the three reports are listed in county name sequence. Within each county, information is further detailed to show the activity experienced by reporting area, agency type and contributor. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

(Name) County Total—This line indicates the total activity of all reporting agencies within the indicated county. It may be expressed mathematically as:

County Total = Municipal + State Police + Sheriff + Department of Natural Resources
or

County Total = Municipal + Rural

Rural—This line indicates the total activity that was reported by rural law enforcement agencies within the indicated reporting area. It may be expressed mathematically as:

Rural = State + Sheriff + Department of Natural Resources

Sheriff—This line indicates the total activity reported by sheriff's offices within the indicated reporting area.

State Police—This line indicates the total activity reported by all State Police Detachments within the indicated reporting area. It may be expressed mathematically as:

State Police = State Police Detachment 1 + SPD2 + SPD3 +

Department of Natural Resources—For purposes of these computer generated reports, activity for the Department of Natural Resources is included with activity for the Sheriff's offices. A separate summary of DNR activity for each district appears in a later section of this report.

MUNICIPAL—This line indicates the total activity reported by all municipal law enforcement agencies within the indicated reporting area. It may be expressed mathematically as:

Municipal = Municipality 1 + M2 + M3 +

(City Name) Police Department—This line indicates the total activity reported by the individually specific police department.

For comparative purposes, each reporting agency or area identified on the report details the activity experienced for the calendar year of 1981 and 1980 respectively. Also, the numerical difference and the percent change between the two years has been calculated and displayed on separate lines. All amounts are signed with a plus (+) or minus (-) sign to indicate whether the quantity has increased or decreased from 1980 to 1981. An asterisk (*) appearing on the percent change line indicates that due to no activity being reported for either 1981 or 1980, calculation of percent change was impossible.

It should be noted that statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of West Virginia and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

CRIME INDEX REPORT

The tabulations in this section indicate the volume and distribution of crime in West Virginia on the basis of a crime rate.

The Uniform Crime Reporting Program utilizes eight crime classifications to establish a rate to measure the trend and distribution of crime. The number of actual offenses of murder, forcible rape, robbery, felonious assault, burglary, larceny and motor vehicle theft are reflected in this report. The number of actual offenses of manslaughter and assaults (not aggravated) are not index offenses, thus counts of these offenses are not considered in this report. Arson, the eighth Crime Index Offense, is examined in a separate section.

Each heading contained in this report is defined below.

Population—Estimated population of the indicated reporting area. This information, representative of the year 1981, was provided through the assistance of the Federal Bureau of Investigation and the United States Bureau of Census.

Total Offenses—This is the sum total of the seven Index Offenses.

Total Cleared—The sum total of the seven Index Offense cleared.

Percent Cleared—The percentage of Index Offenses cleared by arrest or exceptional clearance.

The mathematical formula may be expressed as follows:

$$\text{Percent Cleared} = \frac{\text{Total Index Offenses Cleared}}{\text{Total Actual Index Offenses Reported}} \times 100$$

Crime Rate—This is sometimes referred to as a victim risk rate and is representative of the number of Index Offenses per 1,000 population.

Example - A crime rate of 10.00 would imply that 10.00 persons of each 1,000 population were the victim of an Index Offense.

The mathematical formula for calculating the crime rate of any reporting area may be expressed as follows:

$$\text{Crime Rate} = \frac{1,000}{\text{Area Population}} = \text{Reciprocal}^* \times \text{Total Actual Offenses}$$

$$\text{Crime Rate} = \frac{\text{Total Actual Offenses}}{\text{Area Population}} \times 1,000$$

*Reciprocals developed to five (5) decimal places.

The remaining columns of the report indicate the number of actual Index Offenses reported by category.

A separate section is provided to summarize offense and arrest data for the Department of Natural Resources on a District basis. This section is provided because Department of Natural Resources data is included in the category of Sheriff on the proceeding computer printed pages.

Early in 1979, in accordance with the FBI-UCR Program, the West Virginia UCR Program began collecting arson data submitted by the UCR contributing agencies. During 1981, there were 735 actual Arson offenses reported with an estimated damage to property of \$6,483,247. 172 of the arsons, or 23.4 percent, were cleared.

DOMESTIC VIOLENCE

Domestic Violence

The increasing number of abuse between family members prompted the enactment of House Bill 802. This bill mandated the collection of domestic violence. Information on spouses, persons living as spouses, persons who formerly resided as spouses, parents, children and stepchildren, or other persons related by blood or marriage is collected.

Abuse: The occurrence of one or more of the following acts between family or household members who reside together or who formerly resided together.

1. Attempting to cause or intentionally, knowingly or recklessly causing bodily injury with or without a dangerous or deadly weapon.
2. Placing by physical menace another in fear or imminent serious bodily injury.
3. Sexually abusing a person under the age of 18 years.

GLOSSARY OF TERMS

ADULT—For West Virginia Uniform Crime Reporting purposes, a person age 18 or above.

ARREST RATE—The number of arrests reported for Part I and Part II Offenses for each unit of population, generally per 100,000. Arrest rates are computed in the same manner as crime rates.

CRIME INDEX—The sum total of eight major offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications used in the Index are: Murder, Forcible Rape, Robbery, Felonious Assault, Breaking and Entering, Larceny—Theft, Motor Vehicle Theft and Arson. Each of these offenses is referred to as an Index Offense.

CRIME RATE—The number of Index Offenses reported for each unit of population, generally per 100,000. Crime Rates are computed for communities with varying populations by dividing the Index Crimes by the population and multiplying the answer by 100,000. (Example: 500 Index Offenses — 10,000 population x 100,000 = 5,000 Crime Rate).

EXCEPTIONAL CLEARANCE—A crime solution or clearance recorded when some element beyond law enforcement control precludes the placing of formal charges against an offender.

JUVENILE—For West Virginia Uniform Crime Reporting purposes, a person under the age of 18.

PART I OFFENSES—The first of two main categories of crime classes composing a Universal Crime Classification System established for Crime Reporting purposes. Part I Offenses are by their very nature more serious and/or occur most frequently. The monthly tabulation of Part I Offenses provide a count of "Offenses Known".

PART II OFFENSES—The second of two main categories of crime classes composing a Universal Crime Classification System established for Crime Reporting purposes. Part II Offenses are generally less serious in nature and/or occur less frequently. Monthly tabulations of Part II offenses are limited to arrest information only.

PROPERTY CRIME—Consists of the Index Offenses of Breaking and Entering, Larceny—Theft, Motor Vehicle Theft and Arson.

VIOLENT CRIME—Consists of the Index Offenses of Murder, Forcible Rape, Robbery, and Felonious Assault.
